

COVID-19 Team Report and Recommendation to Tribal Council July 19, 2021.

This protocol is for Tribal Buildings, Enterprises have their own boards who can make decisions on their behalf for COVID Protocols. The COVID Team is concerned about the low overall vaccination rate. Until we reach 70% vaccination rate or if the data shows we are not being infected this protocol stays in place.

- **All Tribal Buildings:** If any person is not a regular employee/customer to ANY tribal building, they need to show proof of COVID vaccination by showing their CDC card or a picture of their card. Monitors should know by now who are regulars to their building, so they do not have to show proof every time.

If proof cannot be provided, masks need to be worn.

Those who are vaccinated no longer need to wear a mask, however if they enter another tribal building and are not a regular they need to show proof.

ALL those entering Tribal buildings need to have their temperature taken and a daily log kept on file in case there is an exposure in the building so contact tracers can access if necessary.

- Masks are no longer required for people who are outdoors, though social distancing and masking is still encouraged.
- Events no longer need to be approved by the COVID Team.
- Buildings no longer will be closed when there is an exposure. Each case will be reviewed and evaluated separately and sections will be sanitized.
- Those who use tribal vehicles as part of their job and have passengers need to wear masks at all time.
- Travel for work is still restricted but will be reviewed individually by GM's and Director's for approval then forward to S/T.
- If any Tribal employee travels out of state, have no COVID symptoms, they can report to work, but if they had NOT been vaccinated they are required to take a COVID-19 test within 4 days upon their return with documentation.
